

Learn more

The ACHS Clinical Indicator Program (CIP) is **the world's largest dedicated** clinical indicator data collection and reporting service.

More than **650** participating healthcare organisations

330+ clinical indicators

Endorsed and developed by over **40** Australasian healthcare colleges, societies, and associations

23 specialty medical disciplines

Background

CIP was established in 1989 with an aim to give members a consistent and valuable way of measuring, benchmarking, and tracking their performance.

Clinical Indicator Sets

There are 23 Clinical Indicator (CI) sets and over 330 CIs for healthcare organisations to choose from in the Clinical Indicator Program that relates to the health services they provide and are appropriate to their size and type of organisation.

The Clinical Indicator Program (CIP) is offered free of charge to Members accredited by ACHS International.

You can also join the CIP as a non-member. Contact us at pos@achs.org.au for more information.

CIP provides international context and benchmarking for your organisation using our advanced performance data system, Metrik.

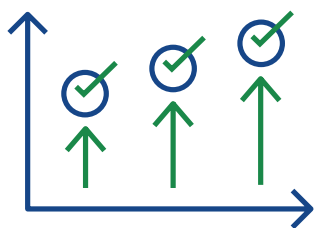

Provides benchmarking to inform comparison

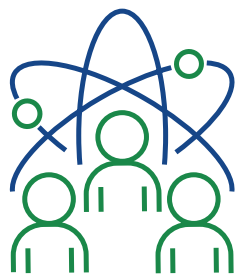

Highlights areas for further analysis and improvement

Provides assurance of organisational performance

Supports evaluation of service performance for ongoing improvement

Facilitates quality and safety communication between multi-disciplinary groups

Helps organisations understand their responsibility in safety and quality

How does CIP work?

Submit data and manage your account on our advanced data measurement and analytics system

Submit clinical indicator data every six months

Access to AI powered reports and dashboards for each indicator benchmarked against your peers

Access our annual Australasian Clinical Indicator Report (ACIR)

The Clinical Indicator Program (CIP) is offered free of charge to Members accredited by ACHS International.

You can also join the CIP as a non-member. Contact us at pos@achs.org.au for more information.
