

For organisations aiming to achieve excellence in their quality improvement journey, ACHS International provides a recognition program featuring our **EQuIP7 Advanced Person Centred Systems (PCS) Module**.

The EQuIP7 Advanced PCS Module was developed in Australia, one of the world's best performing and most highly ranked healthcare systems.

It contains cutting-edge elements around person-centred care, that are reflective of **top achieving healthcare providers** around the world.

PCS is designed to focus on engagement and participation with patients, staff, families, and the community in the design and delivery of care services.

Our research and various international evidence have indicated that focusing on Person Centred Care has a positive influence on the patient experience, safety and quality, outcomes delivered, and the value of care provided.

By undertaking the EQuIP7 Advanced PCS Module, your organisation will:

Transcend accreditation requirements

Fully embrace & integrate Person Centred Care

Achieve continuous quality improvement

*“Achieving the highest level of accreditation from ACHS International was an **outstanding milestone** for our hospital, showcasing our commitment to putting patients first and empowering our staff to further excel in delivering exceptional person-centred care.*

*Through ACHSI accreditation, we gained **invaluable insights and tools** that have enhanced our ability to improve patient experiences and outcomes, reinforcing our patient-first approach.”*

Linda Burgoyne - CEO, Matilda International Hospital, HONG KONG

BENEFITS OF PERSON CENTRED SYSTEMS

Empower, engage, and support patients, consumers and carers in their own care and across the continuum of care.

Continue to build trust through ongoing improvements to outcomes, quality, safety, and the overall patient experience.

Build resilient teams through an organisational **learning culture**, which values systems thinking, lifelong learning, leadership, and adaptivity.

Achieve results through **collaboration** with patients, consumers, carers, community, and partners in all aspects of the organisation.

Embed the **values and fundamentals of person-centredness** through **safe and just cultures**.

Lead change through innovation, communication, and engagement to recognise gaps and drive improvements.

*“The Person-Centred System (PCS) program from ACHS International has been **transformative** for Saudi German Health.*

*With ACHSI’s **expert guidance**, we integrated patient-centred care throughout our services, significantly improving patient satisfaction and outcomes, and reinforcing our commitment to compassionate, personalised care.”*

Dr Amr El Saify - Group Quality Reviews Director, Middle East Healthcare Company (MEAHCO), Saudi German Health, SAUDI ARABIA
